ELSEVIER Journal of Materials Processing Technology 46 (1994) 520

Journal of Materials Processing Technology

Contents of Volume 46

Vol. 46, No. 1–2, October 1994

Selected papers from the International Conference on Cold and Warm Forging Technology, Columbus, OH, USA, September 27–29, 1994

1. State of the Technology

Current level of development of warm forging technology 3
S. Sheljaskov (Darmstadt, Germany)

The state of the art in cold forging lubrication 19
N. Bay (Lyngby, Denmark)

Conditions for a structured layout of precision forging 41
E. Doege, J. Thalemann, F. Weber (Hannover, Germany)

2. Tool design and process simulation

Fatigue failure of cold forging tooling: causes and possible solutions through fatigue analysis 57
M. Knoerr (Columbus, OH, USA), K. Lange (Stuttgart, Germany), T. Altan (Columbus, OH, USA)

Improvement of tool life in cold forging of complex automotive parts 73
Y. Nagao (Tochigi, Japan), M. Knoerr, T. Altan (Columbus, OH, USA)

New developments in the design of high performance stripwound cold forging tools 87
J. Groenbaek, E.B. Nielsen (Nordborg, Denmark)

Application of computer aided process design in the automotive forging industry 99
H. Yano, K. Kaneko, M. Hayashi (Aichi, Japan)

Recent development and applications of finite element method in metal forming 117
J. Tang, W.T. Wu, J. Walters (Columbus, OH, USA)

Application of computer aided simulation to investigate metal flow in selected forging operations 127
H. Kim, K. Sweeney, T. Altan (Columbus, OH, USA)

3. Advances in processes and applications

Flashless and precision forging of connecting rods from P/M aluminum alloys. . . . 157
K. Siegert, D. Ringhand (Stuttgart, Germany)

Modern cold forging applications for the manufacture of complex automotive parts 169
S. Onodera, K. Sawai (Aichi, Japan)

Computer aided approach for design and optimization of cold forging sequences for automotive parts 185
R. Duggirala (Saginaw, MI, USA), R. Shivpuri, S. Kini, S. Ghosh, S. Roy (Columbus, OH, USA)

Elsevier Science S.A.

4. Equipment, process and part handling

Modern applications of complex forming and multi-action forming in cold forging 201
T. Nakano (Kanagawa, Japan)

Equipment and process technology for semi-hot extrusion in combination with cold extrusion 227
E. Körner, J.A. Schöck (Göppingen, Germany)

Some aspects of the economic production of complex steel components by cold forging and machining 239
K. Lange, H.-J. Keller (Stuttgart, Germany)

Recent advances in cold and warm forging process modeling techniques: selected examples 253
R. Shivpuri, S. Babu, S. Kini, P. Pauskar, A. Deshpande (Columbus, OH, USA)

Vol. 46, Nos. 3–4, November 1994

Selected papers from the International Conference on Sheet Metal Forming Technology, Columbus, OH, USA, October 3–5, 1994

1. State of the Technology and Process Simulation

Recent manufacturing technologies for auto-body panel forming tools 277
T. Nakagawa (Tokyo, Japan)

Process simulation in sheet metal forming. 291
A. Makinouchi, M. Kawka (Wako, Japan)

Practical application of process simulation in stamping 309
M. Karima (Oakville, Ont., Canada)

Computer-aided design and calculation of deep drawn components. 321
E. Doege, F. Boinski (Hannover, Germany)

Recent innovations in sheet material forming. 333
D. Lee (Troy, NY, USA)

Industrial applications of computer simulations in stamping 351
D. Lefebvre, E. Haug, F. Hatt (Troy, MI, USA)

2. Equipment and Part Handling

Optimization of sheet metal forming processes by determination of the force vector and the position of its application 393
K. Siegert, J. Ladwig (Stuttgart, Germany)

Cross-bar cup feed transfer press for automotive application 401
S. Soda (Osaka, Japan)

Critical factors for achievement of successful high speed metal forming production 409
D.A. Schoch (Minster, OH, USA)

Multimode electronic transfer feed. 415
J. Engerski (Chicago, IL, USA)

3. Materials, Lubrication and Tooling

Computer simulation for tool and process design in sheet forming 421
M.A. Ahmetoglu, G. Kinzel, T. Altan (Columbus, OH, USA)

Application and forming of higher strength steel 443
S.P. Keeler (Auburn Hills, MI, USA)

Recent trends in sheet metals and their formability in manufacturing automotive panels 455
H. Hayashi (Wako, Japan), T. Nakagawa (Tokyo, Japan)

4. Recent Developments in Die Design and Manufacturing

Hydromechanical drawing of automotive parts 491
S. Nakamura, H. Sugiura, H. Onoe, K. Ikemoto (Aichi, Japan)

Pressure controlled nitrogen cylinders for draw dies 505
M. Schlegel (Stuttgart, Germany)
